Successnet

Our math series is online! Please use this resource at home when you need clarification on a math lesson or when you would like to provide your student with extra practice. Here, students can view their textbooks online, view tutorials, play games, practice with activities and take quizzes. Each student has his/her login and password and has been given time in class to explore the website.

Xtramath

Students need to know their math facts with speed and accuracy to complete more difficult computation in upcoming chapters. Without this foundation, they will have great difficulty. Multiple-step problems will take extreme amounts of time. Addition, subtraction and multiplication are useful tools for everyone in everyday life. Students are now required to log on for 5-10 minutes each day of the week.
